EXPERIENCE

Nasdaq

Montreal, QC

Senior Director of Software Engineering

Sep 2021 – Present

- Lead engineering teams and technical strategy powering the core data transformation engine for Nasdaq Metrio's enterprise Sustainability platform.
- Architect high-throughput data pipelines with Python, Pandas, and Polars to orchestrate and aggregate complex environmental impact metrics at enterprise scale.
- Drive technical strategy and architectural alignment across teams to deliver enterprise-grade sustainability reporting and intelligence for global clients.

Core Platform Lead (Metrio – acquired by Nasdaq)

- Architected distributed data transformation pipelines utilizing Python, Pandas, and Apache Beam to process high-volume environmental datasets.
- Preserved system stability and engineering momentum through Metrio's acquisition by Nasdaq, ensuring continuous delivery for enterprise clients.

Shopify

Montreal, QC

Engineering Manager – Email Platform

Jun 2015 – Aug 2021

- Managed engineering teams delivering Shopify's first-party email marketing platform, covering campaign authoring tools, real-time behavioral pipelines, and deliverability protection.
- Scaled high-availability infrastructure supporting hundreds of thousands of global merchants while engineering automated systems to safeguard sender reputation and IP health.
- Partnered with cross-functional leadership across Product, UX, and Data Science to define product analytics, driving merchant adoption and campaign engagement.

Staff Data Engineer – Platform Infrastructure & Distributed Systems

- Engineered a reusable incremental processing framework with PySpark, standardizing distributed data workflows across internal engineering and data teams.
- Integrated data platform infrastructure across GCP, Spark, Hadoop, and Dataflow, optimizing cluster resource utilization and pipeline reliability.

Engineering Manager, Senior Developer, Developer

- Led engineering initiatives across mission-critical commerce systems, including automated SSL provisioning for millions of merchant domains, checkout discounting rules, and Shopify Scripts.

Ajah

Montreal, QC

Senior Developer

Aug 2012 – Jun 2015

- Engineered backend services and relational data pipelines using Python, PostgreSQL, and SQLAlchemy to scale the Fundtracker non-profit intelligence platform.

COMMUNITY LEADERSHIP

Montréal-Python

Montreal, QC

President

Sep 2011 – Jan 2019

- Grew the regional developer community, hosted monthly bilingual technical workshops, and spearheaded the successful initiative to bring PyCon US to Montreal (2014–2015).

PyCon US (Python Software Foundation)

Montreal, QC

Co-Chair (PyCon 2014 & PyCon 2015)

Apr 2013 – Apr 2015

- Organized and co-chaired the largest global annual Python conference, hosting 2,000+ attendees, 200+ talks and tutorials, and 125+ corporate sponsors.

CORE COMPETENCIES & TECHNOLOGIES

Leadership & Strategy: Engineering Management, System Architecture, Cross-functional Execution, Platform Engineering

Data Engineering & Cloud: Distributed Systems, Incremental Data Pipelines, GCP, Dataflow, Hadoop, Terraform, PostgreSQL

Languages & Frameworks: Python, Go, Polars, Pandas, Apache Beam, PySpark, Spark, SQL, Bash

EARLY CAREER HIGHLIGHTS

VP Engineering | HighScoreHouse

Apr 2012 – Aug 2012

Senior Python Developer | Le Site

May 2010 – Apr 2012

Software Developer / Consultant | QNX, Savoir-faire Linux, Alter Way, Toon Boom Animation

2007 – 2011

EDUCATION

UQAM | Université du Québec à Montréal

Montreal, QC

Bachelor of Computer Science

2003 – 2007
